Jl. Solontongan No.2

Computer Science undergraduate at BINUS University with a strong interest in Artificial Intelligence, Software Engineering, and Cloud Computing. Experienced in developing academic and personal projects involving machine learning, computer vision, and responsive web development. Familiar with Python, Java, web technologies, and collaborative development tools. Eager to apply technical knowledge, strengthen software development skills, and contribute to practical technology solutions through an internship opportunity.

Jenjang Pendidikan

BINUS University - Bandung, Indonesia — Sep 2024 - Oct 2028 (Perkiraan)
Bachelor of Semester 5

SMA Negeri 8 Bandung - Bandung, Indonesia — Jul 2021 - May 2024
Senior High School

PROJECT EXPERIENCE

AI Herbal Leaf Classification - Bandung, Indonesia

- Developed a computer vision project to classify herbal leaves using Convolutional Neural Networks (CNN) and the VGG16 architecture. Explored an AI-based approach to streamline herbal leaf identification and improve the efficiency of plant recognition. Technologies:
- Python, TensorFlow, CNN, VGG16, Computer Vision.
-

Personal Portfolio Website - Bandung, Indonesia

- Designed and developed a responsive personal portfolio website to showcase academic background, technical skills, projects, and professional interests.
- Implemented the website using HTML and CSS and deployed it through GitHub Pages. Technologies:
- HTML, CSS, GitHub Pages, Responsive Design.

ORGANIZATIONAL EXPERIENCE

BINUS Crypto Community (BBCC) - Bandung, Indonesia — - Sekarang
Community Member

- Participated in community activities focused on blockchain technology and digital assets.
- Expanded knowledge of emerging technologies through collaborative learning and community engagement.

Keterampilan, Prestasi & pengalaman lain

- **TECHNICAL SKILLS** (2026): 1. Programming Languages: Java, Python, PHP, JavaScript
  2. Web Development: HTML, CSS, Laravel, Vue.js
  3. AI & Machine Learning: Machine Learning, Computer Vision, Convolutional Neural Networks (CNN), VGG16, TensorFlow
  4. Tools & Platforms: Git, GitHub, Docker, Linux, Google Cloud Platform (GCP)
- **SOFT SKILLS** (2026): Problem-Solving · Teamwork · Communication
- **AREAS OF INTEREST** (2026): Artificial Intelligence · Software Engineering · Cloud Computing · Web Development · Emerging Digital Technologies
