PROFESSIONAL SUMMARY

Computer Science student at BINUS University with interests in Software Engineering, Cloud Computing, Artificial Intelligence, and Web Development. Has explored programming, web technologies, Docker, and cloud computing through academic projects and practical exercises.

EDUCATION

BINUS University — Computer Science
Expected graduation: 2028

TECHNICAL SKILLS

Programming: Java, Python, PHP, JavaScript
Web Development: HTML, CSS, Laravel, Vue.js
Tools: Git, GitHub, Docker, Linux
Cloud: Google Cloud Platform (GCP)

PROJECTS

AI Herbal Leaf Classification

Academic team project exploring herbal-leaf image classification using a convolutional neural network (CNN) and the VGG16 architecture. Contributed to selected parts of the project as a team member.

Technologies: Python, Deep Learning, Computer Vision
Repository: github.com/wahyubudii/CNN-VGG16-Herbal-Leaf-Classification

Docker PHP Hello World

Learning project based on a tutorial, with code modifications to explore running a simple PHP application in a Docker environment and configuring services with Docker Compose.

Technologies: PHP, Docker, Docker Compose
Reference repository: github.com/mfieldhouse/docker-php-helloworld

ORGANIZATIONAL EXPERIENCE

BBCC (BINUS Crypto Community)

EVENTS & ACTIVITIES

BINUS Crypto Community — 2026
